Captain Scott's Unique Contrivance For South Pole Dash

Captain Scott has secured a motorboat sledge that experts declare will ry him to the south pole without any trouble. This sledge is a unique con-Wance and has had a successful tryout in Norway. The driving wheel does t touch the ground. An endiess chain fitted with spuds passes over the drive wheel and slides under the runner. The appearance of the sledge when in operation strikes one as being very curious, as the chain when coming in contact with the ground appears to stand still while the siedge slides forward on it. The upper section of the chain travels twice as fast as the sledge.
